There is an old adage that we use often in Michigan, “If you don’t like the weather, just wait five minutes, and it will change.” We often hope that the drizzle and light snow will change to pleasant spring days, and warm summer nights, but unfortunately, they sometimes change to lightning and thunderstorms, or lake effect snow and blizzards.

This months meeting will focus on a topic we are all aware of, *Severe Weather*. Our special guest this moth is Ginger Zee of Wood TVs Storm Team 8. She has been a member of the West Michigan based news station for nearly a year, and is as a highly qualified meteorologist and experienced storm-chaser, Ginger reports stories for 24 Hour News 8, covering the environment, science and the impact of weather.

During severe weather, viewers see Ginger team up with the other members of Storm Team 8, reporting on the weather from out in the field.

This months meeting will be held at the Meijer Gardens, where they currently have their famous butterfly exhibit. We are also calling this our Spouses night, and is a good opportunity to get your spouse or significant other a look into the safety profession, as well as enjoy a tour of Meijer Gardens. Seating is limited to 50 people, please RSVP to Mike Rabach.
