

PRESENT

The Southeast Michigan Residential & Commercial Construction Safety Training Workshop

***Tuesday, March 20, 2007, 7:30 am to 3:00 pm @
Total Sports Complex, 30990 Wixom Rd. Wixom***

THE WORKSHOP

Four of the areas strongest associations have teamed up this year to bring the very best in safety training to the Southeast Michigan Residential & Commercial Construction Safety Training Workshop. This full day workshop is specifically targeted to "the boots" in the field, the folks who are actually putting themselves in harms way in one of the most dangerous industries in this country. Every year thousands of American workers are killed, disabled or injured on construction projects. In addition MIOSHA issues citations and fines for the very things that are killing us. Take advantage of this winter's lull to give your employees the tools they need to best protect themselves from construction site hazards. Help them go home at the end of the day a little dirty, a little tired, but in the same physical condition as when they stepped out of the house that morning.

This conference is geared to all sectors of the construction industry. Over the course of one day you will have to opportunity to interact with and learn from a variety of experts and peers who are out there on the job site every day.
